An Invitation to Partner with the International Conference on Quantum Energy

The International Conference on Quantum Energy 2023 (ICQE 2023), hosted by CSIRO (4- 6 December 2023, Melbourne), is the inaugural event of a biennial convention that focuses on the role of quantum technology in meeting future energy challenges and opportunities.

Join research experts, industry partners, and governmental bodies to find out about the latest developments in quantum thermodynamics, quantum transport, quantum information theory, quantum chemistry, quantum biology, spectroscopy, light-harvesting devices, optoelectronics, nuclear fusion, photochemistry, quantum materials, state-of-the-art battery technologies and other quantum energy-related topics, and develop collaborations, explore commercialisation pathways, and investment opportunities.

On behalf of the ICQE 2023 Organising Committee, I encourage you to consider a mutually-beneficial partnership as a sponsor of this three-day high-profile event and to take advantage of the valuable exposure and recognition on offer.

Yours sincerely

Dr James Q. Quach

Science Leader in Quantum Science and Technologies

Why Sponsor ICQE 2023

According to the International Energy Agency, each human uses more than 80 GJ of energy per year; this is equivalent to leaving a washing machine continuously running for one year for every person on Earth. This consumption is expected to increase by 28% by 2040. The majority (86%) of this energy comes from fossil fuels. This dependence on fossil fuels comes with major environmental costs, with climate change arguably being the greatest challenge facing our era. Renewable energy offers a possible solution. Renewable energy sources, like solar and wind are not continuous, and therefore energy storage technology or batteries, remain an urgent challenge for further worldwide adoption of renewable energy.

Alongside the need for efficient batteries to store renewable energy, portable batteries make them an essential component in electronic devices. The increasing rate of miniaturisation of electronic devices faces the challenges and opportunities of quantum effects.

ICQE is the first of a biennial conference that focuses on the role of quantum technology in meeting future energy challenges and opportunities. This offers sponsors an unprecedented opportunity to establish strategic relationships with industry leaders and thought leaders across all levels of government and the private sector.

Australia is a world leader in quantum science and technology. Investing in a partnership with ICQE will help to strengthen support for the development, commercialisation and adoption of quantum technologies in Australia and the rest of the world.

We are inviting sponsors who are aligned with our purpose, values and brand. We believe in sustainable partnerships, innovation and solving the industry's biggest challenges together.

While we will do our best to accommodate your preference, some options may not be available.

What to Expect at ICQE 2023
